PRACTICAL-2: Semantic HTML5 Pages with Accessibility-Ready Structure

Problem Definition: Develop static HTML5 skeletons for at least 10 StudentHub pages such as Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, FAQ, and Feedback. Use semantic tags and accessibility-friendly structure.

Output:

Repository link:

- https://github.com/manthan5033/WEB-DEVELOPMENT/tree/main/Practical-2

Key-Questions:

1. Are semantic tags used properly?
--Yes, semantic tags such as <header>, <nav>, <main>, <section>, <article>, <aside>, and <footer> are used properly.

2. Are form labels and other elements accessible?
--Yes, proper form labels, headings, image alt text, and navigation links are used for accessibility.

3. Is the page structure consistent?
--Yes, a consistent structure is maintained across all pages.

Learning:

- Developed static HTML5 skeletons for 10+ StudentHub pages.
- Used semantic tags such as <header>, <nav>, <main>, <section>, and <footer>.
- Created pages including Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, FAQ, and Feedback.

- Applied an accessibility-friendly structure using proper headings, labels, links, and image alt text.
- Maintained a consistent layout and navigation structure across all pages.
